

## Clean Air by ALCO Filters

In view of the approaching summer period **ALCO** reminds car owners and automotive specialist to change the cabin air-conditioning filters in their cars.

**ALCO** recommends changing the cabin filter every 15000Km- or at least once a year ensuring clean air in the interior of the vehicle. Regular filter replacement of the filters can also extend the useful lifetime of ventilation and air conditioning systems.

**ALCO filters** have recently invested in the state-of-the-art technology for the manufacturing of cabin filters, with pollen and active carbon media.

CLEAN AIR  
CLEAN AIR

• Polluted air enters the interior of the vehicle through the air conditioning system  
• The polluted air contains large quantities of dust, pollen, food and other particles as well as gases that are harmful to health.  
• Frequent change of the cabin filter ensures clean air, which avoids fatigue, headaches, allergic reactions and long-term lung diseases.

Quality filters recognized in 40 countries around the world

*'In our continuous effort to maintain ALCO's competitive advantage and superb quality we have invested in the purchasing of a fully automated manufacturing line for our cabin air filters'* said Mr Antonis Louca Managing Director of **ALCO Group**. *'The complete investment was in excess of €350,000 and has given ALCO the capability to manufacture any kind of cabin air filter'* continued Mr Louca.

**ALCO** has developed a wide range of more than 300 filters applicable for cars, vans and trucks. **ALCO** uses a multilayered synthetic media, able to repel moisture and to trap harmful particles down to 0.1micron.

For additional filtering requirements cabin air filters with activated carbon keep harmful exhaust fumes, dirt and dust as well as high ozone concentrations and unpleasant smells outside the car cabin.

---

ALCO Filters was established in 1973 and produces filters for cars, trucks, earth moving equipment and stationary engines. The company's product portfolio includes air, oil, fuel, hydraulic and cabin filters and covers more than 3000 different types of filters with more than 200 new types added yearly.

ALCO has grown to become a trusted name in more than 40 countries throughout Europe, Africa and the Middle East and has four large distribution facilities in the UK, Germany, Greece and Cyprus ensuring fast and efficient delivery worldwide.
